

Comprehensive insights for enterprise conferencing

With VQ Conference Manager Advanced Analytics

All the insights you need to run a modern, self-hosted conferencing service.

Who is Advanced Analytics for?

VQ Conference Manager Advanced Analytics is for organizations running Cisco-based collaboration. It provides a single pane of glass through which they can monitor their service.

What does Advanced Analytics enable you to do?

- ✓ Understand how your service is running, and who's using it
- ✓ Access service-wide insights across meetings, participants, collaboration devices, edge devices, and Cisco Meeting Server
- ✓ Proactively identify problems
- ✓ Plan for service growth

ADVANCED ANALYTICS

Keep your finger on the pulse of your Cisco conferencing service, with VQ Conference Manager Advanced Analytics.

Understand how your conferencing service is performing

Get a rich and holistic picture of how your conferencing service is running, and who's using it.

Ready-made dashboards combine real-time and historical information about your conferencing service, including:

- ✓ Participants
- ✓ Meetings
- ✓ Collaboration devices
- ✓ Edge devices
- ✓ Cisco Meeting Server

Troubleshoot service issues

Use Advanced Analytics to troubleshoot service problems quickly – potentially before they impact users.

Set up automated alerting when data exceeds certain thresholds, and view historical data to identify and respond proactively to emerging concerns.

Proactively plan for growth

Ensure your conferencing service continues to meet your organization's needs as these evolve. With Advanced Analytics, you can:

- ✓ Monitor trends to identify when upgrades will be required
- ✓ Find opportunities to reallocate under-used equipment, instead of buying new
- ✓ Gather evidence for investment business cases

Build custom reports

Need a specific visualization? Advanced Analytics lets you create it, using the intuitive drag-and-drop Kibana Lens interface.

ADVANCED ANALYTICS

Integrate with corporate analytics tools

Connect Advanced Analytics to your existing SQL-based enterprise reporting platforms, to combine conferencing insights with other data.

Built on Elastic

VQ Conference Manager Advanced Analytics is built on proven Elasticsearch and Kibana software. Elastic spends \$350M+ per year on R&D, meaning you benefit from state-of-the-art analytics, coupled with the assurance that you're using Elastic technology that's trusted by 50% of the Fortune 500, including Cisco.

Book your demo now
