

Comprehensive insights for enterprise conferencing

With Analytics

All the insights you need to run a modern, self-hosted conferencing service

Who is Analytics for?

Analytics is for organizations running Cisco-based collaboration. It provides a single pane of glass through which they can monitor their service.

What does Analytics enable you to do?

- ✓ Understand how your service is running, and who's using it
- ✓ Access service-wide insights across meetings, participants, collaboration devices, edge devices, and Cisco Meeting Server
- ✓ Proactively identify problems
- ✓ Plan for service growth

ANALYTICS

Keep your finger on the pulse of your Cisco conferencing service, with Analytics.

Understand how your conferencing service is performing

Get a rich and holistic picture of how your conferencing service is running, and who's using it.

Ready-made dashboards combine real-time and historical information about your conferencing service, including:

- ✓ Participants
- ✓ Meetings
- ✓ Collaboration devices
- ✓ Edge devices
- ✓ Cisco Meeting Server

Troubleshoot service issues

Use Analytics to troubleshoot service problems quickly – potentially before they impact users.

Set up automated alerting when data exceeds certain thresholds, and view historical data to identify and respond proactively to emerging concerns.

Proactively plan for growth

Ensure your conferencing service continues to meet your organization's needs as these evolve. With Analytics, you can:

- ✓ Monitor trends to identify when upgrades will be required
- ✓ Find opportunities to reallocate under-used equipment, instead of buying new
- ✓ Gather evidence for investment business cases

Build custom reports

Need a specific visualization? Analytics lets you create it, using the intuitive drag-and-drop Kibana Lens interface.

ANALYTICS

Integrate with corporate analytics tools

Connect Analytics to your existing SQL-based enterprise reporting platforms, to combine conferencing insights with other data.

Built on Elastic

Analytics is built on proven Elasticsearch and Kibana software. Elastic spends \$350M+ per year on R&D, meaning you benefit from state-of-the-art analytics, coupled with the assurance that you're using Elastic technology that's trusted by 50% of the Fortune 500, including Cisco.

Book your demo now

Discover how Analytics can give your teams all the insights they need to run your conferencing service.
